WORK EXPERIENCE

Sandbox Banking — Software Engineer

SEPTEMBER 2018 - PRESENT

- Integrated banking systems, including Salesforce, nCino, IBS Connectware, and others, using a data-driven design framework.
- Extended and maintained our integration engine, written in Python. Built new services, including ACH file generation.
- Managed relationships with product owners, oftentimes serving as the direct (and only) contact for a given project.

Boston Health Care for the Homeless — Case Manager

AUGUST 2016 - JUNE 2018

- Worked closely with clinical team to treat social determinants of health among patients with co-occurring psychiatric and medical conditions.
- Built and shipped an internal wiki to aggregate case management resources and procedures. Currently in commercial use by Case Management team (~30 staff) and partner agencies.
